To whom it may concern,

This is to certify that Gabriel Ramos-Fernandez presented the talk “Fission-fusion dynamics in space: measuring and modeling cohesion in spider monkeys” as part of our Visiting Speakers in Primatology series. It was our pleasure to have Dr. Ramos-Fernandez come and speak to our concentration of international researchers here in Western Canada, as he is emerging as an international leader in developing new conceptual and methodological approaches to understanding the fundamentals properties of primate/mammal social organization.

Sincerely,

A handwritten signature in black ink that reads "MSM Pavelka". The signature is written in a cursive, flowing style.

M.S.M. Pavelka
Professor and Head
