Remineralization of organic carbon in eastern Canadian continental margin sediments

Norman Silverberg, Bjorn Sundby, Alfonso Mucci, Shaojun Zhong, Takeshi Arakaki, Per Hall, Angela Landén & Ander Tengberg

Undisturbed sediment samples were collected for chemical analyses at six sites during winter and summer cruises to the eastern Canadian continental margin. Micro-electrode oxygen profiles were obtained in freshly collected multicorer samples, and replicate cores were incubated at in situ temperature for 48
