Proliferation of *Amphidinium carterae* (Gymnodiniales: Gymnodiniaceae) in Bahía de La Paz, Gulf of California

Ismael Gárate Lizárraga

During a sampling on 15 December 2011 in Bahía de La Paz, a bloom of the benthic dinoflagellate *Amphidinium carterae* was detected. Its abundance ranged from 28.2 to 64.8×10^3 cells L⁻¹. Cells of *A. carterae* varied in length from 18 to 28

Palabras clave: Gulf of California, Proliferation, *Amphidinium carterae*, benthic dinoflagellates
