

Aguíñiga García, S., A. Sánchez González & N. Silverberg (2010). Temporal variations of C, N, $\delta^{13}\text{C}$ and $\delta^{15}\text{N}$ in organic matter collected by a sediment trap in Cuenca Alfonso, Bahía de La Paz, SW Gulf of California. *Continental Shelf Research*, 30(5): 1692-1700. DOI: 10.1016/j.csr.2010.07.005

Temporal variations of C, N,

Sergio Aguíñiga García, Alberto Sánchez González & Norman Silverberg

To monitor the composition and the vertical flux of particulate matter from the sea surface, a sediment trap was moored in Cuenca Alfonso, Bah

Palabras clave: stable isotopes, Cuenca Alfonso, particulate element fluxes, Body growth, Organic carbon and nitrógeno, C:N ratio
